18 Coins Payout? (Y/N)	If no payout, check for jam in payout slides, tube, etc. The number of coins from a BONUS is the same as generated by a Bell/Bell/Bell win.		

Note: All metal/metal regions are "light oil only, sparingly applied." Sometimes, it is better to clean thoroughly and have no lubrication whatsoever. DO NOT USE any water displacement sprays. Use a cotton swab dipped in a premium light sewing machine oil to lubricate the hard-to-reach areas. For the cams pictured above, try using a length of dental floss soaked in degreaser. Gently enter the small opening and clean the region thoroughly... do not tear the floss or leave remnants.
