## Research

Do you have a question about your antique slot machine? Has it been "in the family" for years and you have no idea how it came into your possession? Is there a machine in your collection with a potentially "checkered" past?

We pride ourselves on research. We need the manufacturer, serial number, model number, high-resolution photos of the interior and exterior **and** an approximate date when you acquired your machine. We will try to find the origins/history of your family collectible.

If you have serial numbers inside of the machine, that would be especially helpful as well.

It may take us some time. Please be patient. This service is complimentary. We enjoy the challenge of solving puzzles.

(We cannot give any value estimates on your machine, sorry. In addition, reproduction/revamp machines cannot be tracked.)
